

To view report cards on a web browser

Aeries Mobile Portal App Features - Report Cards

<https://support.aeries.com/support/solutions/folders/14000116304>

The Report Card section offers a way to view your student's report cards on file.

Main screen

On the main list of report cards, you'll see all the report cards on file for the selected student. On each report card in the list, it shows which school it's from, the year, grade, term, and date of the report. Below that, it offers buttons to download the report card in any language that has been made available.

The report card itself is in the form of a PDF you can download to your mobile device. Once it's downloaded, you can email it or otherwise share it with yourself to view it on a desktop computer.
